KHANH C. TRAN
PRIMARY EXAMINER

1. The Amendment filed on 06/06/2007 has been entered. Claims 1-3 and 5-20 are pending in this Office action.

2. Claims 1-3 and 5-20 renumbered as claims 1-19 respectively.

Response to Arguments

3. Applicant's arguments, see Applicants' Remarks, filed on 06/06/2007, with respect to claims 1-3, 6-7 and 20 have been fully considered and are persuasive. The rejection of claims 1-3, 6-7 and 20 has been withdrawn.

4. Objection of claims 10 and 17 has been withdrawn after being corrected for all informalities.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

5. Regarding claim 1, claim is allowable over prior art record because the cited references taken alone or in combination cannot teach or suggest "providing at least one selectable delay for each of a first plurality of signal lines adapted to receive signals transmitted from the first receiver to the second receiver; and providing at least one selectable delay for each of a second plurality of signal lines adapted to receive signals

transmitted from the second receiver to the first receiver; and selectively adding delay via the programmable delay element to the signals until the signals are aligned"

6. Regarding claim 8, claim is allowable over prior art of record because Haq et al. and Asada et al. do not disclose a bi-directional system for de-skewing signals on parallel bus channels.

7. Regarding claim 10, claim is allowable over prior art of record because Haq et al. and Asada et al. do not disclose an apparatus for use with asynchronous interface as set forth in the application claim.

8. Regarding claim 17, claim is allowable over prior art of record because Haq et al. and Asada et al. do not disclose an apparatus comprising a supplemental asynchronous interface device as set forth in the application claim.

9. Claim is allowable over prior art of record because the cited references taken alone or in combination cannot teach or suggest "(b) determine one or more selectable delays that cause the first and second receivers to exchange signals without errors; and (c) cause the asynchronous interface to employ the one or more selectable delays during subsequent transmission of signals between the first and second receivers wherein the asynchronous interface includes a plurality of signal lines".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
